

# RAILWAY SYSTEM

## PLATFORM GAP FILLER (PGF)

S.K. Polymer created Platform Gap Filler(PGF) to prevent people from falling into the space between trains and platforms.

Our PGF was implemented in Thailand's Airport Rail Link, as well as in the United States and Norway.

We intend to make transportation safer for passengers of all ages, as well as persons with disabilities worldwide.

## RUBBER RAILWAY CROSSING PANEL

Rubber Railway  
Level Crossing Panel | Internal  
Dimension : 600 x 526.5 x 170 mm.

Rubber Railway  
Level Crossing Panel | External  
Dimension : 600 x 728 x 170 mm.

Rubber Level crossing panels at road crossings, natural rubber products strengthened with a specific formula are placed between railroad tracks to replace brittle concrete slabs.

These rubber substitutes are supple, flexible, and incredibly shock-absorbing; they guarantee longevity and a more comfortable, vibration-free ride for cars, as well as greatly prolonging their service life.

## STRAP HANGER

## FASTENING SYSTEM COMPONENTS

Elastic Clip  
Rail Insulator

Rail Shoulder

Rail Pad

## SLEEPER GAP FILLER

## RUBBER WEDGE

## BALLAST REGULATOR BROOM

## UNDER SLEEPER PAD

## RUBBER FOR MOLD CONCRETE RAILWAY SLEEPER
